EDUCATION

Olabisi Onabanjo University — Ago-Iwoye, Ogun State, NG *Expected Nov 2027*
Bachelor of Science, Computer Science
Relevant Coursework: Data Structures & Algorithms, Database Systems, Object-Oriented Programming, Operating Systems, Computer Networks

TECHNICAL SKILLS

Programming: Python, JavaScript (ES6+), TypeScript, SQL
Web Development: Django, FastAPI, REST API design, PostgreSQL, MySQL, relational schema design
AI / ML: PyTorch, Hugging Face Transformers, scikit-learn, OpenCV, LLM Fine-Tuning, Prompt Engineering
Frontend & Tools: React, Tailwind CSS, HTML5, CSS3, Bootstrap, Docker, Git/GitHub, Linux/Bash, Postman, Jira
Database:

PROFESSIONAL EXPERIENCE

Full-Stack Developer | Visaro Nigeria *Dec. 2025 – August 2026*

- Built modular, responsive UI components in React and Tailwind CSS for the customer onboarding and identity verification flow.
- Standardized client-server API contracts, defining request/response schemas and error-handling conventions for asynchronous verification requests.

Back-End Developer | Jexhub Limited *Nov 2024 – Dec 2025*

- Co-architected backend services for the Jexcelhub e-commerce platform in Django and MySQL, covering inventory, cart, and checkout flows.
- Built and maintained 20+ RESTful endpoints with schema-level payload validation and consistent structured error responses.
- Shipped platform features on a sprint cadence alongside frontend engineers and UI/UX designers.

Software Engineering Intern | HNG Tech *Jan 2024 – Mar 2024*

- Completed successive elimination stages of a competitive remote internship, delivering Python engineering tasks under fixed deadlines.
- Implemented backend feature modules in Django and FastAPI and collaborated on responsive, cross-browser web interfaces.

KEY PROJECTS

Bukka AI — Python, FastAPI, Hugging Face Transformers, Webhooks *Dec 2025 – Present*

- Built an agentic order-intake system for food vendors that classifies inbound message intent, routes to persona-driven response generation, and confirms orders without manual vendor involvement.
- Designed asynchronous webhook pipelines for payment reconciliation using idempotency keys and retry handling, so duplicate or dropped provider callbacks cannot double-count transactions.
- Awarded prototype development grant funding from Project I2M (Innovation to Market) following successful live pilot testing.

CedarMen Collection (cedarmen.shop) — Django, MySQL, Chart.js, Bootstrap *2025*

- Built and deployed the production backend for a live storefront serving 100+ SKUs with relational stock management and order fulfilment tracking.
- Implemented server-side cart and session persistence so carts survive across sessions and devices.
- Built analytics dashboards with Chart.js surfacing live inventory levels, sales velocity, and customer purchasing trends.

TSA Global Consulting Platform (tsaglobalconsulting.com) — Python, Django, REST APIs *2025*

- Architected backend course-delivery infrastructure for curriculum management and automated student enrollment tracking.
- Developed and documented 15+ RESTful API endpoints with custom serializers and request validation.

Fundwave — Django, Payaza API, Chart.js, Bootstrap *2024*

- Built an interactive crowdfunding dashboard for AbkFinhack 2024, visualizing case progress, donor metrics, and goal completion in real time.
- Integrated the Payaza payment gateway API to automate donation processing and campaign reconciliation.

HONORS, AWARDS & LEADERSHIP

- **1st Place (Faculty Level)** — Olabisi Onabanjo University Research Innovation Challenge, 2026
- **2nd Place** — African Entelligence Lab Prediction Game, Deep Learning Indaba, 2026
- **Campus Community Ambassador & Co-Lead** — Data Science Nigeria (DSN), OOU Chapter, Jan 2026 – Present
- **Campus Ambassador** — Cowrywise, 2025 – Present
- **Research Team Member** — RAIN (Robotics & AI Nigeria), OOU
